MIRIMICHI GREEN®
WEED CONTROL
Non-selective Herbicide

NATURAL HERBICIDE

Organic, effective weed and grass control.

FOR AGRICULTURAL USE

For contact spray control or burndown of weeds and grasses for ornamentals, turf, nurseries and greenhouses.

FOR COMMERCIAL USE

For contact spray control or burndown of weeds and grasses. For use in structural pest control of vegetation in pasture and rangeland. For use in parks, golf courses, greenhouses and commercial turf and grounds.

Mirimichi Green Weed Control is a fast-acting, nonselective, organic herbicide that can be used for residential, commercial, and non-crop uses. It is a great natural alternative to traditional weed killer products. **Mirimichi Green Weed Control** is ideal for controlling weeds in gardens, greenhouses, walkways, farmsteads, and flower beds or spot treating around ornamental trees, bushes, flowers, and landscaping beds. **Mirimichi Green Weed Control** is registered for public uses such as municipalities, sports fields, and golf courses. The product is known to be safe to use around people and pets when used as directed.

The formulation is available in an easy-mix concentrate and in a ready-to-use spray. The product does not require a surfactant and will start showing results after just 15 minutes. The powerful organic formula acts on contact and is rainfast in two hours after drying. Because **Mirimichi Green Weed Control** is rapidly broken down in the soil, there is no chance for environmental buildup or runoff into waterways and it will not leach through the soil to harm desirable plants. The EPA registered and OMRI Listed product is sure to control and burndown annual and perennial weeds and grasses.
