MIRIMICHI GREEN PEST CONTROL

ALL NATURAL PESTICIDE

AVAILABLE IN: 1 GAL., 2.5 GAL., 30 GAL., 55 GAL.

Are pesky bugs disrupting your outdoor areas? Mirimichi Green's Pest Control is the solution with proven efficacy and safety.

It controls mosquitoes, fleas, ants, roaches, no-see-ums, chiggers, spiders, mites, whitefly, aphids, plus many more insects. Mirimichi Green's Pest Control was tested by standards set by the World Health Organization. The efficacy test revealed an 80+ percent kill rate for pests and larvae in a 24 hour period. By killing the larvae, egg cycles are disrupted so future outbreaks of pests are eradicated in the treated areas over time. Mirimichi Green's Pest Control is known to be safe to spray around people, pets, and plants, with an immediate re-entry time after the spray has settled, making it ideal for any outdoor area. Try using this safe, effective and organic pest control for all of your pest management accounts such as: parks & recreation areas, campground sites, sports fields, golf courses, universities, landscaping, gardens and more!
