

MIRIMICHI GREEN™

Activate Nature.

APPLICATION RATES

Spread at the rate of 2.77 lbs. - 5.50 lbs. per 1,000 SF

Spread 2.77 lbs. per 1,000 SF of product for a 1/2 lb. Nitrogen application

Spread 5.50 lbs. per 1,000 SF of product for a 1 lb. Nitrogen application

APDS - EQUINE

AEROBIC PRECISION DELIVERY SYSTEM

18-0-6 - SPARGED FERTILIZER

50 LB BAGS, 40 BAGS/PALLET

Mirimichi Green APDS - Equine is a sparged granular fertilizer coated with nutrients and premium carbon. APDS - Equine is specially formulated to treat equestrian facilities in any condition all while keeping the health of the horses in mind. It delivers a variety of micro and macro-nutrients, carbon, chlorine, and essential trace elements needed by the soil. The NPK serves as a carrier to aerobically charged carbon and a long term food source for the plant.

The NPK of this fertilizer was specifically formulated to:

- Enhance root growth
- Reduce compaction
- Quicker turf recovery from damage
- Create a healthier soil profile
- Create a safer riding surface

The liquid technology that is sparged onto the fertilizer is designed to:

- Extend rapid biological growth in the soil
- Increase the availability of NPK to the plant
 - 3x the Nitrogen, 30x the Phosphorus, and 50x the Potassium

The liquid technology is a blend of nutrients and micronized liquid carbon. Putting carbon back into the soil as a nutrient stabilizer helps:

- Aerify the soil
- Buffer the pH
- Increase CEC

The benefits of APDS - Equine are extensive and the lasting results will bring added value to all equine facilities.

KEY PRODUCT BENEFITS

- **Easy spreadability**
- **Enhances root growth**
- **Reduces soil compaction**
- **Micronized carbon delivers nano-nutrients**
- **Enhances other fertilizer applications**
- **Optimizes pH**
- **Feeds an increased range of beneficial biology**
