ByoSpxtrum™
Complex Microbiology for Soil

WATER-ACTIVATED POWDER

PURPOSE:

ByoSpxtrum is designed to enhance the indigenous plant-friendly microbial populations in the soil.

ByoSpxtrum is a complex combination of microbes, soil and plant amending ingredients, critical enzymes, and microbial food sources. The combination of these ingredients will make indigenous beneficial microbes explode in numbers in the soil. This will improve the organic matter in the soil and breakdown thatch and other dead plant matter into usable nutrients. Plants need more than the few so-called superstrains of beneficial bacteria and fungi. They need a wide variety and diversity of biology, which **ByoSpxtrum** delivers.

The vast complex of microbes in **ByoSpxtrum** helps plants grow efficiently and effectively at all stages of growth. Unlike other soluble powder inoculations on the market, **ByoSpxtrum's** microbes activate to full life in seconds due to the proprietary process that avoids stunning or harming them. **ByoSpxtrum** is comprised of components that are 100% non- GMO and non-synthetic, and it is approved for use on certified organic crops.

1 pouch of ByoSpxtrum (17 oz) is enough to treat approximately 5 acres.

APPLICATION	RATE	FREQUENCY
Greens/Tees	3.4 to 6.8 oz per acre	Apply every 2 weeks
Fairways	(2.2 to 4.4 grams per 1,000 sf)	Apply every 4 weeks
Roughs		Apply every 6 weeks
General Turf		Apply every 4-6 weeks
Trees	3.4 to 6.8 oz per 100 gal of water (2.2 to 4.4 grams per gal)	Apply at installation and 2-4 times per year for maintenance.
Backpack Sprayer	3.4 to 6.8 oz per 100 gal of water (2.2 to 4.4 grams per 1,000 sf or per gal)	

KEY PRODUCT BENEFITS

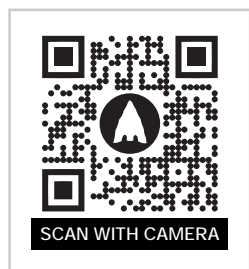

- Inoculates soil with diverse population of bacteria and fungi beneficial to soil and plant life
- Invigorates root growth
- Helps break down soil compaction
- Enhances resistance to drought, pests and disease
- Improves photosynthetic performance
- Improves nutrient uptake
- Does not contain fillers
- Increases Brix levels

RECOMMENDED EQUIPMENT: Backpack or Tank Sprayer

Direction for spray applications:

1. Activate the ByoSpxtrum by combining approximately 6 oz of water for each 1 oz of ByoSpxtrum powder in a container. Agitate the slurry until any clumps are dissolved and powder is uniformly suspended in the liquid.
2. Prepare your spray tank with water or liquid fertilizer as needed.
3. Pour the ByoSpxtrum slurry into your spray tank and agitate or top off with water to disperse it throughout the tank.
4. Apply directly after adding to the tank.

Guaranteed analysis:
Non-plant food ingredients35.20%
 Bacillus Subtilis 3.5 x 10⁷ cfu/g
 Bacillus Megaterium 1.75 x 10⁷ cfu/g
 Bacillus Licheniformis 1.75 x 10⁷ cfu/g
 Bacillus Simplex 1.75 x 10⁷ cfu/g
 Glomus Intraradices 55 ppg/g
Total Other Ingredients64.80%

AVAILABLE SIZES: 17 ounces, 8 ounces
