

EMPRO GRANULAR SOIL ENHANCER

Mirimichi Green is pleased to announce a unique soil amendment designed for use with walk-behind spreaders as the latest addition to Ewing Irrigation's professional-grade Empro line.

GUARANTEED ANALYSIS

Pine wood Biochar.	45%
Humate	25%
Sunflower Hull Ash.	15%
Total Ingredients.	85%

Also contains Non-Plant Food Ingredients:

Silica.	15%
-----------------	-----

Contains natural inputs known to improve the texture of the soil and increase the organic content which allows the soil to hold nutrients and moisture.

EMPRO GRANULAR SOIL ENHANCER HELPS:

- Drive deeper root growth and strengthen plant cell walls
- Aerate soil and reduce compaction
- Optimize pH
- Increase water holding capacity
- Increase nutrient uptake (CEC)
- Promote natural chelation of Iron
- Provide fast green-up and recovery
- Condition and improve soil texture
- Improve plant immunity to weather changes such as drought tolerance, diseases, and pest pressures
- Prevent plant uptake of heavy metals
